

the duration of each period of operation.

(7) Equipment to be used. If manufactured, list name of manufacturer and type number. For other equipment, describe in detail and furnish a circuit diagram.

(8) Frequency(ies) desired and range of frequencies which could be employed.

(9) The method by which the frequency of operation will be determined.

(10) Frequency tolerance.

(11) The means by which this tolerance will be maintained.

(12) DC plate power input to final radio frequency stage. If not known, indicate any known power rating of equipment and state whether this is power output of transmitter or radiated power, and whether average or peak.

(13) Type of emission including a description of the modulation that will be applied, if modulated.

(14) Description of the antenna to be used, including height above ground.

(c) The application shall be accompanied by a signed statement from the principal of the school, or a member of its faculty, on appropriate letterhead, stating that the project has the approval of the school and indicating the person under whose general supervision the project will be conducted.

§ 5.403 Waiver of construction permit.

Subject to the requirements of §§ 5.401 and 5.402, the provisions contained in section 319(d) of the Communications Act are waived insofar as such provisions require the issuance of a construction permit prior to the issuance of the student authorization provided for in this subpart.

§ 5.404 [Reserved]

§ 5.405 Power limitation.

No authorization under this subpart will be issued unless the description of the project shows that the dc plate power input to the final radio frequency stage does not exceed 5 watts: *Provided, however,* That a greater power may be authorized if a satisfactory showing is made that such greater power is necessary and that appro-

priate measures will be taken to prevent interference.

§ 5.406 Frequencies.

(a) Frequencies in the following bands are available for assignment in authorizations issued under this subpart:

27.23–27.28 MHz.

460–461 MHz.

462.525–467.475 MHz.

2450–2500 MHz.

(b) In each case, the carrier frequency must be far enough inside the band so as to keep the sideband energy within the band limits specified.

[28 FR 12506, Nov. 22, 1963, as amended at 35 FR 5618, Apr. 7, 1970]

§ 5.407 Measurements required.

The frequency of operation must be measured or checked prior to each time of operation.

§ 5.408 Waiver of technical and operating requirements.

Subject to the provisions of §§ 5.405, 5.406, and 5.407, the provisions in subparts C and D of this part are waived insofar as such provisions require a station authorized under this subpart to observe the technical and operating requirements set forth therein.

§ 5.409 Noninterference condition.

Each authorization issued to a student under this subpart is subject to the condition that no harmful interference, as defined in § 5.3(h), is caused to any authorized station.

[38 FR 12744, May 15, 1973]

§ 5.410 Record of operation.

(a) The licensee holding an authorization issued under this subpart shall maintain a record of operation containing the following information:

(1) The date and time of each period of operation.

(2) The frequency of operation as measured or checked at the beginning of each period of operation.

(3) A brief description of the experimentation being conducted.

(b) Each entry shall be signed by the person operating the equipment.

§ 5.411

(c) These records shall be retained for one month after the termination of the authorization.

§ 5.411 Notification.

(a) The holder of an authorization issued under this subpart shall notify the Engineer in Charge of the district in which the station will be operated in advance of each scheduled operation.

(b) The notice to the Engineer in Charge shall be in writing and shall contain the following information:

- (1) Place of operation.
- (2) Date(s) of operation, including exact time if known.
- (3) Frequency(ies) to be used.
- (4) Call letters of station.

PART 11—EMERGENCY ALERT SYSTEM (EAS)

Subpart A—General

Sec.

- 11.1 Purpose.
- 11.11 The Emergency Alert System (EAS).
- 11.12 Two-tone Attention Signal encoder and decoder.
- 11.13 Emergency Action Notification (EAN) and Emergency Action Termination (EAT).
- 11.14 EAN Network and Primary Entry Point (PEP) System.
- 11.15 EAS Operating Handbook.
- 11.16 National Control Point Procedures.
- 11.17 Authenticator Word Lists.
- 11.18 EAS Designations.
- 11.19 EAS Non-participating National Authorization Letter.
- 11.20 State Relay Network.
- 11.21 State and Local Area Plans and FCC Mapbook.

Subpart B—Equipment Requirements

- 11.31 EAS protocol.
- 11.32 EAS Encoder.
- 11.33 EAS Decoder.
- 11.34 Acceptability of the equipment.
- 11.35 Equipment operational readiness.

Subpart C—Organization

- 11.41 Participation in EAS.
- 11.42 Participation by communications common carriers.
- 11.43 National level participation.
- 11.44 EAS message priorities.
- 11.45 Prohibition of false or deceptive EAS transmissions.
- 11.46 EAS public service announcements.
- 11.47 Optional use of other communications methods and systems.

47 CFR Ch. I (10–1–97 Edition)

Subpart D—Emergency Operations

- 11.51 EAS code and Attention Signal Transmission requirements.
- 11.52 EAS code and Attention Signal Monitoring requirements.
- 11.53 Dissemination of Emergency Action Notification.
- 11.54 EAS operation during a National Level emergency.
- 11.55 EAS operation during a State or Local Area emergency.

Subpart E—Tests

- 11.61 Tests of EAS procedures.
- 11.62 Closed Circuit Tests of National Level EAS facilities.

AUTHORITY: 47 U.S.C. 151, 154 (i) and (o), 303(r), 544(g) and 606.

SOURCE: 59 FR 67092, Dec. 28, 1994, unless otherwise noted.

Subpart A—General

§ 11.1 Purpose.

This part contains rules and regulations providing for an Emergency Alert System (EAS). The EAS provides the President with the capability to provide immediate communications and information to the general public at the National, State and Local Area levels during periods of national emergency. The rules in this part describe the required technical standards and operational procedures of the EAS for AM, FM and TV broadcast stations, cable systems and other participating entities. The EAS may be used to provide the heads of State and local government, or their designated representatives, with a means of emergency communication with the public in their State or Local Area.

§ 11.11 The Emergency Alert System (EAS).

(a) The EAS is composed of broadcast networks; cable networks and program suppliers; AM, FM and TV broadcast stations; Low Power TV (LPTV) stations; cable systems; and other entities and industries operating on an organized basis during emergencies at the National, State, or local levels. It requires that at a minimum all participants use a common EAS protocol, as defined in § 11.31, to send and receive emergency alerts in accordance with
